BETTER WATER

BETTER SKIN

Water Lab is a shower head and filter manufacturer that has studied the know-how of the unique filter technology and the design of shower head and bathroom products built by the Water Lab engineers for 12 years.

Water Lab will continue to explore new markets through market analysis and R&D. To meet the diverse needs of the market, we will present a new concept of shower culture from a new perspective.

1. WE CARE **WATER.**

Experts from various fields such as **water, filter technology, professional perfumer, instrument design, product design** gather the best solutions to produce products leading the market.

We strive to develop filter technology that provides healthy and clean water.

2. WE CARE **SHOWER.**

With the product development based on the design philosophy of
**" Pleasure to see,
Pleasure to touch,
Pleasure to take a shower."**

We strive to create a consistent brand experience.

3. WE CARE **SKIN.**

Based on reliable expertise, we develop products that can be used safely even for sensitive skin.

We would like to supply fresh and healthy water to the skin with the technology of the PRM filter Ver.3.0, PR-ACF filter, Aromica Vita C filter, HLP filter, and Dual filter.

PURE RAIN®

Shower head Ver.3.0

PURE + RAIN

Pure Rain is a shower head and filter brand that provides clean water.

Impurity & Rust removal

Handle sediment filter (PRM filter Ver.3.0) having 5~10 micro meter pore size removes suspended material from water.

Water Saving

Very fine holes of the spray plate can save water.

High Water Pressure

Fine holes of the shower plate generate super strong water pressure during shower.

Silky Water Stream

Pure Rain's unique technology makes water stream silky and gentle to relax your body.

PURE RAIN 8 POINTS

- Impurity & Rust removal
- Water Saving
- High Water Pressure
- Silky Water Stream
- Chlorine Removal
- 2 Step Filtration
- Antibacterial Function
- Negative Ions

Chlorine Removal

ACF Shower head : PR-8 PRO · PR-9 PRO
PR-LUXE PRO

ACF filter removes residual chlorine, bad odors, impurities, heavy metal, and contaminants through the process of absorption.

2 Step Filtration

1. PRM Ver.3.0 Sediment filter : Handle
2. ACF filter : PR-8 PRO · PR-9 PRO · PR-LUXE W PRO [Head]

Antibacterial filter :
PR-8 · PR-9 · PR-LUXE W [Head]

Antibacterial Function

Antibacterial filter prevents bacterial growth.

Negative Ions

The stream of water from Pure Rain's unique micro holes on the plate create hundreds of thousands of negative ions.

REMOVAL OF IMPURITIES AND RUST

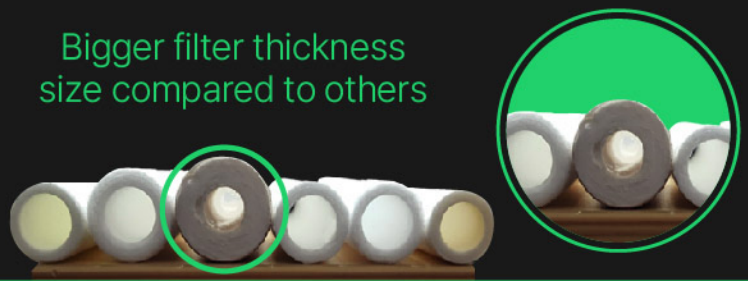

PRM FILTER VER.3.0 removes impurities, rust and organic material in water.

PRM FILTER VER.3.0

1. Removes suspended matter such as sand, loose scale, silt, or organic material in water with a filter pore size of 5 to 10 micrometers.
2. Water purifier grade sediment filter.
3. Long and thick sediment filter capacity.

Bigger filter thickness size compared to others

NEW.

ACF HEAD FILTER

ACF head filter

Unnecessary to install multiple types of filters in shower, manage it with ACF head filter.

PR-8 ACF

PR-9 ACF

PR-LUXE ACF

Features of ACF head filter

1. It is a fibrous activated carbon with intensive development of fine pores on the surface, so the adsorption speed is fast, and it is a high-performance filter with high flow rate to volume.

2. It adsorbs and removes rust, foreign matter, fine heavy metals, etc. in tap water faster and more powerfully than general sediment filters.

SEM observation photo before · after filter use [500X]

BEFORE

AFTER

It is visible that the filter is adsorbed by foreign matter after use.

NEW.

ACF HEAD FILTER

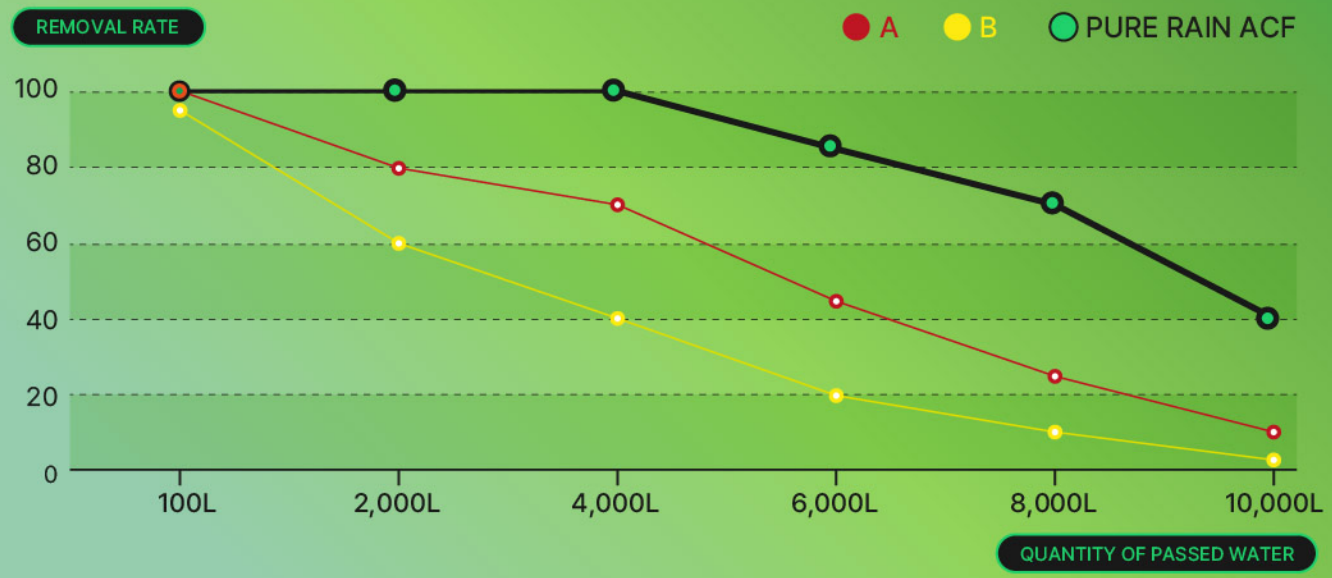

ACF head filter

Removes residual chlorine, impurities, heavy metals, and contaminants.

How long of 100% residual chlorine will be maintained?

- It can be used up to 5 to 6 months, but it is recommended to be replaced every 4 months as the chlorine removal function is deteriorated.
- Replace it if browning is severe or if it smells like tap water.

Comparison chart of our ACF filter residual chlorine removal rate compared to others

Benefits of wet type carbon block filter

1 Wet type carbon block filter

As it is manufactured as blocking wet-type carbon, it has higher internal structure of a density filter than a disk-type carbon filter, thereby demonstrating high performance filter performance.

2 Minimizing carbon dust

During initial water flow, there is little ACF dust outflow, and there is little pH variation in pH.

3 Maintaining fast water flow rates

Water flow is excellent even at carbon filter system, and the filter clogging is less when used for a long time.

4 Primary impurities removal

Remove primary impurities from the surface micro fabric filter.

5 Uniform filtering

The carbon filter made as the suction molding ensures uniformity inside the filter when filtering foreign substances, so that one channel is not blocked.

6 Hard durability

It won't break under a light impact or damage.

STRONG WATER PRESSURE

Pure Rain shower head uses less water and increases water pressure up to 500% stronger than a normal shower one.

The water pressure is stronger and the angle of the water stream is wider.

FOG SPRAY AS A SOFT TOUCH

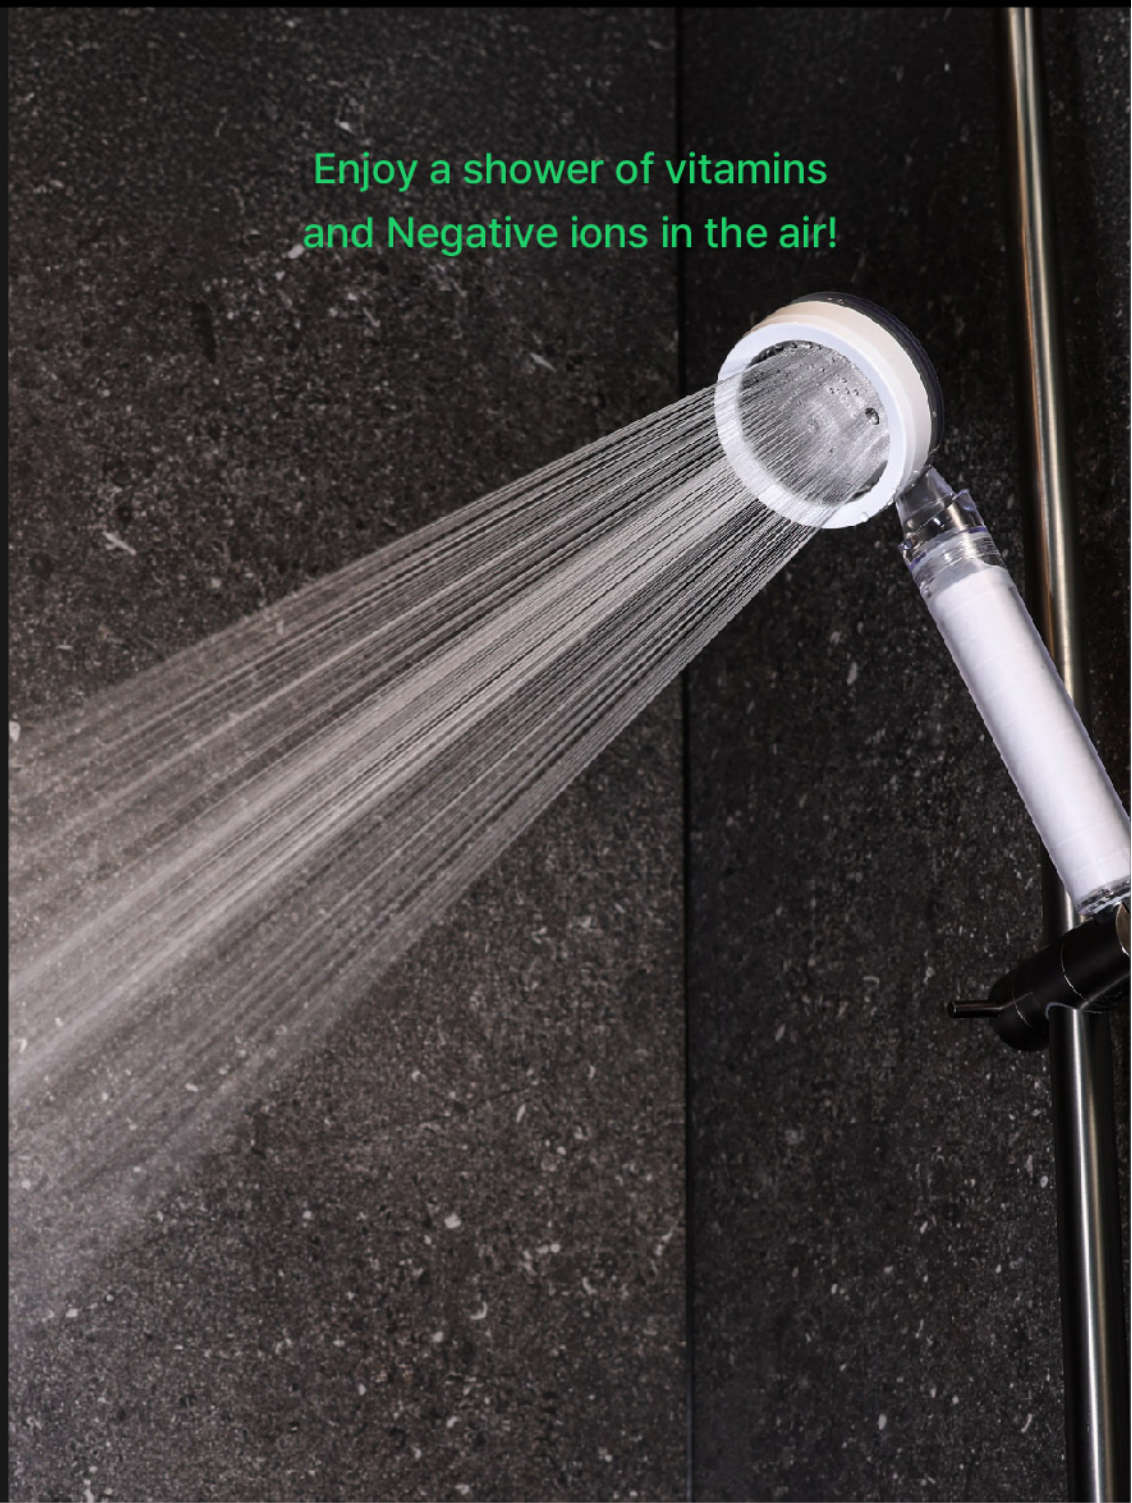

The fine hole spray plate makes water molecules fine and water stream very thin, you can enjoy a silk therapy shower with a soft feeling of Pure Rain.

Very fine holes on the plate.
Now, enjoy Pure Rain's
silky feeling soft shower!

Hole size	0.22mm
Number of holes	215pcs

NEGATIVE IONS SHOWER

NEGATIVE IONS

With very fine holes on the plate can generate over 400,000pcs of negative ions and you can enjoy refreshing shower at home.

Negative ions are absorbed through respiration and skin. It is also called as the 'Vitamin In the air' because it helps promote cell metabolism, improves vitality, recovers from fatigue, and improves concentration.
